Cleaning

Hakomatic B 12

The advantages of the small, handy, robust scrubber-drier machine:

- The Hakomatic B 12 is a handy, compact and easy to transport scrubber-drier machine for use on smaller areas.
- The plate brush head ③ which protrudes to both sides, makes working close to the edge possible and thus saves on intensive follow up work afterwards.
- The plate brush ensures hard floors are cleaned perfectly.
- The low weight and folding handle bar make space saving storage and easy transport possible. ②
- The compact construction offers a high degree of manoeuvrability and a great deal of visibility even on narrow, cluttered and congested areas. ①
- The operating handle bar can be adjusted from the handle itself in terms of height and angle.
- As a result of the removable cover good accessibility for the cleaning of the dirty water tank. ⑤
- As a result of the electric brush ejection the brushes can be changed very easily.
- With the integrated battery charger it is possible to charge the battery at any time from standard plug sockets.
- Apart from using brushes it is also possible to use pads with drive plates. ⑥

Technical Data Hakomatic

B 12

Working width	cm	38
Effective suction width	cm	47
Theoretical area performance, up to	m ² /h	1.500
Rated voltage	V	24
Power/output, brush motor	W	250
Battery capacity	V/Ah	24/25
Pressure	mm/WS	700
Number of brushes	Units	1
Brush revolutions	rpm	130
Brush diameter	cm	38
Tank contents, dirty/clean water	l	22/16
Transport dimensions (L/W/H)	cm	80/47/70
Weight, without battery	kg	40
Weight, wet, with battery	kg	80
