IT'S A CLEAN SWEEP FOR HAKO CITYMASTER 2000

The Hako-Citymaster 2000 is fast becoming a firm favourite for many towns and cities up and down the United Kingdom as they look for a tailor-made street cleaning solution. Despite the economic downturn Hako, who is the only European cleaning machine manufacturer to have the EMAS (Environmental Management and Audit Scheme) accreditation, is enjoying recent success of securing contracts in supply of their eco-friendly road sweepers.

Designed for all year round use the Hako Citymaster 2000 sets new standards in terms of use and driver comfort. It is fully adaptable to meet the needs of the customer and offers numerous cleaning solutions in narrow restricted areas as well as larger open spaces.

In addition to the Citymaster 2000 being versatile the sweeper can be adapted to cope with the winter elements, including the distribution of salt and grit and ploughing or brushing snow. A pressure washer and a hand held suction hose can be added for use in more difficult to clean environments, such as underground car parks or places with height restrictions.

The Hako Citymaster 2000 was a clear favourite for Rossendale Borough Council who purchased three machines earlier this year. Craig Swift, Street Cleaning Supervisor explained: "We were looking to purchasing some new street cleaning equipment when a Hako representative came to visit me. The overall performance of the machine together with the ease of operation was immediately apparent. We have quite a few high kerbs in Rossendale and the Citymaster 2000's tyres give us good ground clearance. Together with a big payload, large clean water tank and superior brushes the machine offers excellent value for money."

Basingstoke & Deane Borough Council is another satisfied customer of the Hako Citymaster 2000. Linda Searle, Senior Environmental Services Manager at the Council said; "Together with selecting a sweeper to suit our street cleaning requirements, Hako's environmental policy was another important criteria for us when making our decision. Something we had to consider, particularly in the current climate, was a product that offered value for money. Hako ticked all of these boxes. Our operatives have commented on how easy the Citymaster 2000 is to use around the town centre."

Press Release

October 2009

Hako Machines even offers customers the choice of top quality used machines fully tested by its own technicians. One customer to take advantage of this offer is Glynn Evans, Street Scene Area Manager, Warrington Borough Council who recently purchased four refurbished Citymaster 2000 models. Glynn said: "We were looking for a sweeper with the ability to remove heavy silt. This versatile small compact cleaner is ideal and offers excellent manoeuvrability with its four wheel steering. Our Citymaster 2000 operatives have commented that the machines are very comfortable and easy to use. Hako's competitive price and after-sales support was a factor in our purchasing decision."

Hako UK is part of the Hako Group, one of the leading manufacturers, worldwide, of technology for indoor and outdoor cleaning and grounds maintenance. The company has factories throughout Europe. For more information on Hako and its range of machines, visit www.hako.co.uk.
