CITYMASTER 1200 CONTINUES TO GATHER ADMIRERS

Enterprise Plc is the latest in a long list of admirers of Hako's Citymaster 1200 sweeping machines. The support services company was so impressed after a single demonstration of the machine that it decided to lease two Citymasters 1200 sweepers and a Citycleaner 1200 street washer on a four-year contract.

"We felt that the Citymaster 1200 represented great value for money compared to other manufacturers," said Kevin Sibley from Enterprise. "And as a result decided to order two rather than the one sweeper we had originally planned.

"We were also really pleased; as were the operators, with the cabs. The visibility is excellent and there is plenty of room for the operator. The cabs are well equipped; which coupled with the space and visibility, makes driving them less tiring compared to other sweepers we've operated in the past."

Leasing the Citymasters ended Enterprise's pursuit of a solution for its client, Slough Borough Council, which was in the process of refurbishing the pedestrianised section of a high street with a new white granite stone.

"This was, obviously, going to present a real challenge in maintaining a good standard of street cleansing," said Kevin. "We looked at a number of options including jet washing and other ride-on scrubbing machines but none gave either a good quality finish or were able to cover enough ground in a day. To this end, we looked at the Hako Citycleaner Street Washer and decided to request a demonstration, which proved to be very successful.

"Secondly, we were already in the market for a new compact, precinct sweeper. Again, the Hako Citymaster 1200 performed well during the demonstration so we decided to discuss the possibility of leasing a 'bundle' of equipment with Hako."

The Citymaster 1200 Sweeper is ideal for various applications, and especially proficient in municipal areas. Its excellent manoeuvrability and all-round view on sweeper and attached implements has gone down extremely well with Enterprise. The Citymaster 1200 incorporates a unique combination of professional sweeper and implements for complete winter service and efficient grounds maintenance.

Press Release

August 2009

Boasting the same impressive features as the Citymaster 1200, the Citycleaner Street Washer swaps the sweeping system at the front of the vehicle for a 1,330 mm scrubbing deck. Located directly behind the scrubbing deck is the high power suction hose, which ensures that all debris and water is picked up immediately, leaving the surface clean and ready for use. The Street Washer, like all Hako machines, is environmental friendly and boasts a manufacturing process, which is fully EMAS certified.

Hako UK is part of the Hako Group, one of the leading manufacturers, worldwide, of technology for indoor and outdoor cleaning and grounds maintenance. The company has factories throughout Europe. For more information on Hako and its range of machines, visit www.hako.co.uk.
