COST EFFECTIVE AND FLEXIBILITY – WITHOUT COMPROMISING QUALITY

As a manufacturer during troubled economic times, it's a major plus when you can offer quality products at the same price and still be deemed value for money. Hako prides itself on providing top class machinery as well as its competitive prices, and Shepway Council, who recently purchased two of Hako's Citymaster 1200s, placed this at the heart of its buying decision.

Flexibility, versatility, robustness and being more cost effective than other manufacturers were key elements that the council's Lesley Jones considered when purchasing the Citymaster 1200. Hako's EMAS accreditation Environmental Management and Audit Scheme was also an integral factor in the decision to buy from Hako.

EMAS is a voluntary initiative designed to improve companies' environmental performance. Its aim is to recognise and reward those organisations that go beyond minimum legal compliance and continuously improve their environmental operation.

The Hako Citymaster 1200 is a machine that is tailor-made to meet the high demands of professional street and footpath cleaning. Its outstanding sweeping performance and extreme manoeuvrability, along with its articulated steering, which remains in the tracks and multifunctional attachment possibilities, make it the ideal economical solution for local authority use.

The Citymaster 1200s have "faired very well," said Jones. "They are flexible enough to clean precincts walkways etc. Our staff have found them fairly easy to learn and enjoy using them."

The Hako-Citymaster 1200 has an integrated, effective and quiet air emission system fitted as standard. With optional noise insulation it is even possible to use the machine at night in noise sensitive areas, outside the time restrictions. The powerful compact sweeper provides an outstanding visibility of the area being cleaned, and remains a professional solution for all cleaning and maintenance tasks.

Hako UK is part of the Hako Group, one of the leading manufacturers, worldwide, of technology for indoor and outdoor cleaning and grounds maintenance. The company has factories throughout Europe. For more information on Hako and its range of machines, visit www.hako.co.uk.
